## 1. Introduction

This document describes how to publish dashboards to make them available in a web browser.

## 2. What you need before you start

Before you start you need to have a GADD Web Server installed. If you haven't done it yet, please follow the steps in "*GADD\_How\_to\_install\_GADD\_Web\_Server.pdf*" to accomplish this.

## 3. Publish a Dashboard

The dashboards files are located in the associated application folder e.g.: "...\App\_Data\Dashboards\EX\_A". To publish a new dashboard you simply add the new dashboard xml-file to the application folder.

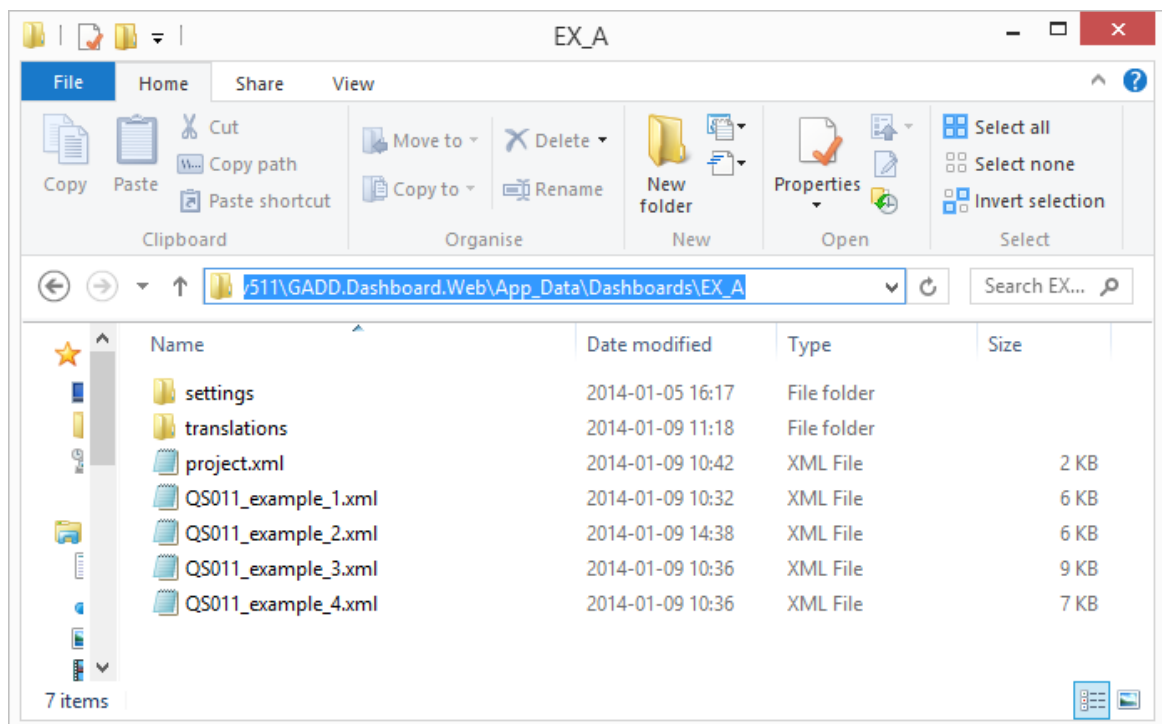

Fig. EX\_A dashboard files.

Access the dashboard from the web browser via:

[http://localhost:89/dashboard/ex\\_a/QS011\\_example\\_1](http://localhost:89/dashboard/ex_a/QS011_example_1)
